Inset Sink Installation Clip Set

Code: ICP

Quantity: 8

Guidelines:

1. Turn the sink up-side-down and place on a clean soft surface to prevent scratching of the sink top surface.
2. Use gloves to prevent cuts or abrasions.
3. Insert ICP clips into rail slots, evenly spaced apart or where best suited, with the clips supplied. Ensure the clip will not pull off.
4. Fold the clips toward the centre of the sink. This will allow the sink to slide smoothly into the benchtop opening.
5. Insert the sink into the benchtop cut-out/opening.
6. Fold the clips away from the sink centre and tighten the screws with a screw driver until the sink pulls firmly onto the benchtop. Do NOT over tighten.
7. NOTE – if using a benchtop less than 13mm you will need to use spacer blocks.
