All measurements are in mm and are for reference only. We recommend using a physical product for final measurement and rough-in stages. While we aim to have all measurements perfect at the time of publication and production normal manufacturing tolerances are to be expected and technical drawings may differ from actual product.
Lumixe reserves the right to make modifications with prior notice.
Cleaning: We recommend a 70% water and 30% methylated spirits mix with a microfiber cloth.
If you have any questions please reach out to your sales consultant or contact Lumixe directly.
