Please note
- Installation shall be in accordance with AS/NZS3500.
- All measurements are in millimetres. Height dimensions are to base of pan. Make allowance for bedding.
- Bedding: Pan may be bedded with cement base or using silicone sealant. Fix pan to floor using a sand cement mixture of 3:1 to a depth of 60mm. Do not use lime or fast-drying cement.
- Bracket fixing: The pan should be bedded with silicone sealant and fixed with the brackets supplied.
- Do NOT use epoxy type adhesives.
- Dimensions are nominal and subject to normal ceramic manufacturing variations.
- Specifications may vary without notice as part of our continuous improvement practices.
- Clean with a damp cloth. Do not use abrasive cleaners, liquids or pastes.

Plati Wall Hung Data sheet page 2

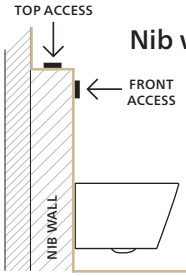

Installation types for WALL HUNG TOILETS

Standard wall – 200 cistern

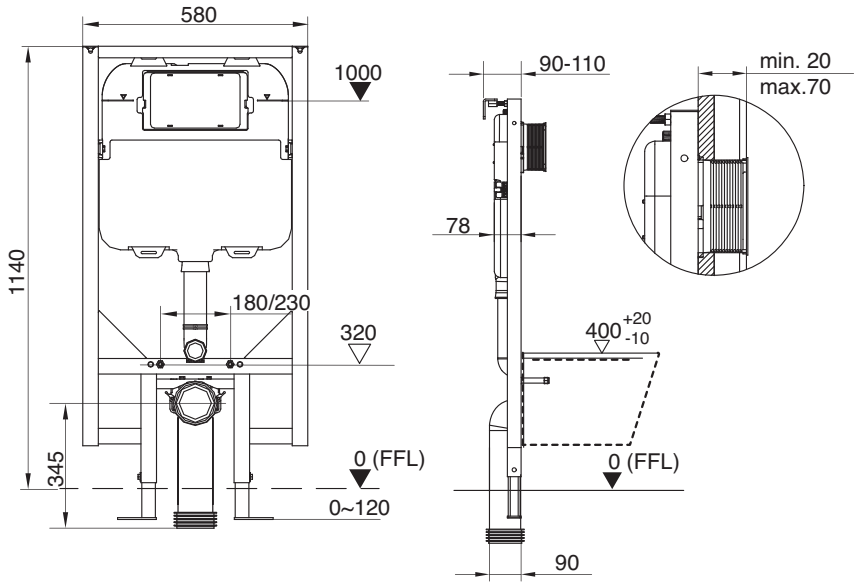

The C200 cistern can be installed within a standard wall, allowing for a cistern thickness of 80 mm. The flush button plate is placed on the wall above the toilet pan (front access). The cistern can be serviced through the flush plate. The C200 cistern can also be used in a nib wall.

Nib wall – 201 cistern

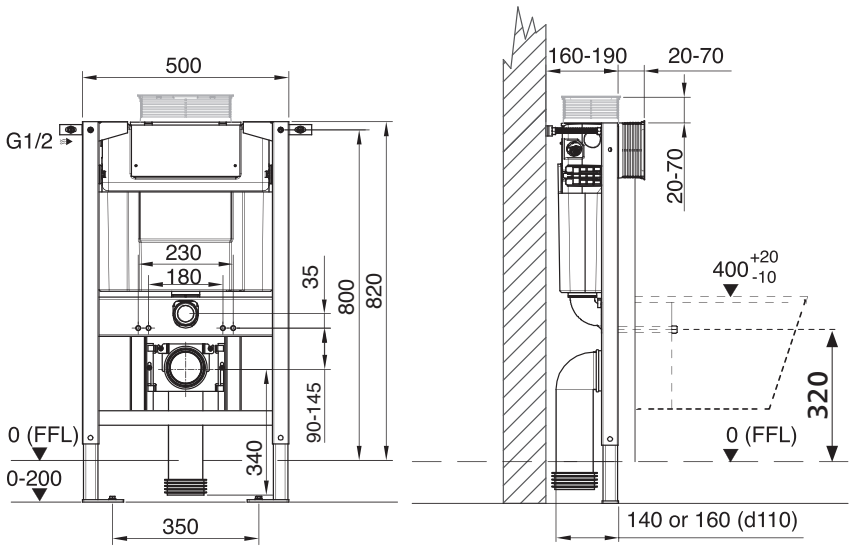

The C201 cistern can be installed within a nib wall, allowing for a cistern thickness of 130 mm. The flush button plate is placed either on the wall above the toilet pan (for front access) OR on the top of the nib wall (for top access).
